Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Figures 1 & 2

Species II: Figures 3 & 4

Species III: Figure 5

Species IV: Figures 6 & 7

Species V: Figure 8

After the Species is chosen, applicant must choose between the following embodiments (A-E):

A. Etching ambient pressure (pg. 9, ¶1):

1. Atmospheric pressure
2. Greater than atmospheric.

B. How the liquid solution and ozone are sprayed onto the layer (pg. 9, ¶1):

1. Separate emitter
2. Common emitter

C. Is substrate spun while spraying occurs (pg. 9, ¶1):

1. Yes
2. No

D. Is a masking material formed over the metal (pg. 11, ¶2):

1. Yes, go to E1 & E2

2. No

E. Type of masking material (pg. 11, ¶2; pg. 13, ¶1):

1. Organic
2. Inorganic

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic. The applicant must elect one embodiment from Group A-E. If the applicant elects any Species I-V, the applicant must specify which embodiment (A-E) he is electing. The applicant must choose an embodiment when electing a Species.

Applicant is required to pick one embodiment from the five groups that include one element from each of the groups A-E. For example, one embodiment of Species I with embodiment A1B1C1D1E1 would be a method of making a semiconductor device when etching under Atmospheric pressure, spraying the liquid solution and ozone through a separate emitter, while spinning the substrate, and forming an organic masking material over the metal.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mark Martin on 4/22/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
